## Description

- Silicon spray system consists of pneumatically operated spray gun and a pressurized tank of 2.5 Litre capacity to store the silicon safely in it.
- The system spray silicon automatically on blade guide for smooth foam cutting operation at circular machines. At any height of the cutting head this system can perfectly spray the silicon on blade guide.
- It can be easily integrated with your existing circular machine to improve the safety of your operators, the operator can spray the siliconas and when required without going near the blade guides.
- It can be controlled directly from the machine panel.

## Technical Details

### Specification

Air Pressure	1-2 Bar for Tank
Auto Spray Gun	0.8 mm Nozzle
Geared Motor	0.5 HP
Max Air Pressure	5-6 Bar for Gun
Power Supply	415 Volt, 50 Hz
Pressurized Silicon Agent Tank	2.5 Litre
